Sustainability...it's in the bag!

Xylobags™ are made with lignin which is an essential ingredient for compost. Lignin is a natural, leftover part of the tree when making paper so no additional trees need to be cut down. Go Eco. Go Xylo.

COMPOSTABLE
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities. **Not suitable for backyard composting.**

With government regulations restricting the use of harmful high-density polyethylene bags, the Xylobag™ provides retailers with a viable, inexpensive bag alternative. The Xylobag™ allows consumers to eliminate unsightly plastic litter from their communities.

- Comparable in strength to regular plastics
- Breaks down in 180 days or less in a compostable environment
- Has a shelf life of 2 years or longer
- Does not dissolve in water
- Reduces landfill waste
